

THE SABRELINE 34

Power, Performance, Comfort

SABRELINE

Sabreline 34 ... The Perfect Cruising Yacht

Ayacht design's true success is proven by its long term popularity. Designers can restyle, rethink and retool but when a boat works as it was intended to work, it simply gets better.

The Sabreline 34 is such a design. Conceived as a couples boat with room for a small family or occasional guests, this motoryacht is as popular today as it was in 1990 when she was first introduced. And her classic styling will be as popular in twenty years as it is in 2000.

The concept is one which runs contrary to the popular trends of the boating industry. This is not another white plastic boat. Rather, she is a hand crafted product that contains a myriad of details and fine workmanship touches which speak to the quality of a Sabreline. Resale values are held high and the cost of ownership low, because, come resale time, there will not be dozens like her on the market.

Designed to go slow when you want to or run at speeds well in excess of 20 knots when you want to get where you're going a little sooner, the Sabreline 34's modified deep-vee bottom is seakindly and comfortable.

SABRELINE

The comfortable main salon

The main salon is the perfect place to relax, when underway or at rest. Large windows surround this space offering a clear view of all that is going on around you. A large L-shaped settee to port and a double settee to

starboard provide ample seating for you and your guests. Her beautiful drop leaf table has enough room for all of the crew and guests to enjoy meals together. Her teak and holly sole is both beautiful and easy to keep.

A Galley That is Designed to be Used

The galley has everything required to create wonderful meals for your crew and guests. A stove with oven, a double stainless steel sink with single lever faucet and plenty of storage for your appliances and provisions; all standard features aboard the Sabreline 34.

When working in this spacious galley, you are always a part of the activity going on in the main salon. Large windows provide plenty of light to this area and slide open to offer ventilation or a fresh breeze.

And to be sure that her galley is as easy to use underway as it is at the dock, galley counters are bordered with laminated wooden fiddles to prevent your dishes from sliding off the work surface.

The spacious galley

The fully equipped lower helm

Unlike many boats of this size, the Sabreline 34 has, as standard equipment, a full lower helm. Here the helmsman can navigate when the weather is too hot or too cold to be out of doors. It is also a nice spot to enjoy a meal while underway. An optional sliding door is available for more immediate access to the side deck from the helm station.

Full sets of engine controls and switches for all navigation and lighting systems, are provided at the lower helm. And all the space you will need for the installation of your navigation system is also available here.

The Sabreline 34's large windshield with wiper and washers, makes operating this boat from the comfort of the lower helm, safe and secure.

SABRELINE

The master cabin is available with a center island berth.

The Master Stateroom... Elegant and Comfortable.

The master stateroom of the Sabreline 34 is available both as a vee-berth as shown here, or as a center island berth. The vee-berth offers more floorspace and a filler cushion is provided to fill the gap in the aft end of the berth. The center island berth offers easy access from either side of the bed.

Hanging locker space is abundant with two large hanging lockers to starboard. Dovetail drawers

offer ample space for all of your personal gear. A large hatch overhead and several stainless steel opening ports, provide light and air to this luxurious cabin. Stainless steel reading lights are placed at both sides of the berth.

For a weekend outing or a long voyage this cabin is the perfect home away from home while aboard your Sabreline 34.

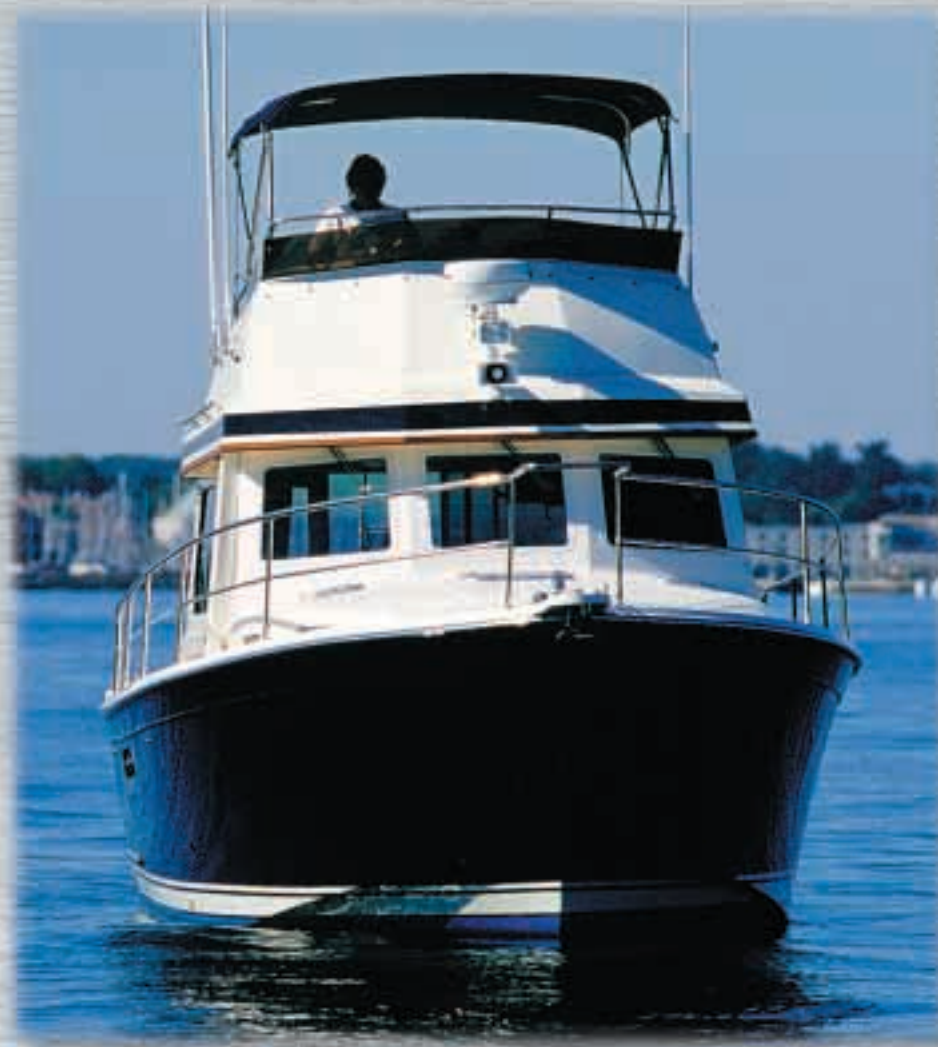

The Functional Head Compartment

The Sabreline 34's head compartment is both functional and easily maintained. Two access doors offer private access from the forward stateroom and from the passageway.

A full shower stall with teak grate is found aft of the head compartment and a bifold door separates the head from the shower.

A Word About Sabre

Sabre Yachts has built the Sabreline range of Motoryachts and Express Cruisers since 1989. The company was founded in 1970 and built only sailing yachts until that time.

Today we build sailing yachts from 36 to 45 feet and motoryachts from 34 to 47 feet in our yards in Raymond and Casco, Maine. Our yachts are sold in the United States, Canada, Europe, Japan and South America, through a network of professional dealers who are committed to providing a high level of service to our owners.

Our skilled craftsmen and women take tremendous pride in their work and strive to provide our owners with the highest possible quality in the yachts that we build.

The Sabre Tool Drawer. Just one example of many details to be found aboard a Sabreline.

SABRELINE

The deck of the Sabreline 34 is perfect for relaxation and socializing. Her cockpit is a comfortable place to relax when dockside or at anchor and the command bridge, the ideal place while running to your destination.

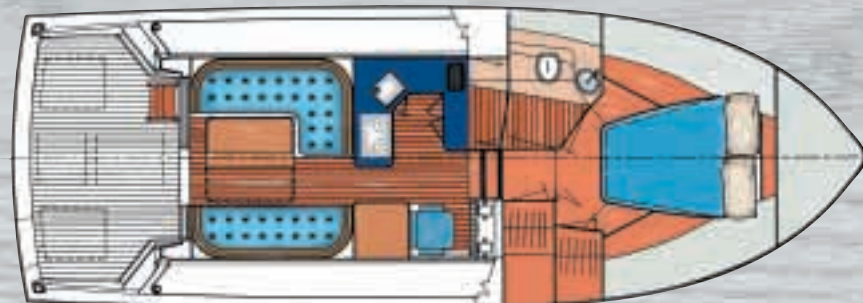

Wide side decks allow the transition from cockpit to foredeck in complete safety and security, even in rough weather. Large diameter hand rails are always where you would expect them to be aboard a Sabreline.

A wide flat foredeck with molded-in anti-slip is an easy surface to walk on no matter what the conditions. A platform for the optional windlass and stowage lockers to port and starboard, make docking and setting the anchor convenient and effortless.

Designed by boaters, for boaters, the Sabreline 34 offers all you could want in a small, easy to handle package.
